- Google Digital Marketing
- HubSpot Digital Advertising
- GA4 for SEO — Jeff Sauer

FEATURED IN

- Forbes (client placement)
- Under30CEO
- TechBullion
- CMO Times

PROFILE

Product marketer with 4+ years at the intersection of customer insight, competitive positioning, and GTM execution. At Business Standard I owned India GTM for IPO season, moved core market rankings from 8.2 → 5.0, and independently authored two cross-functional product proposals currently in the roadmap pipeline. At RankSoldier I went from intern to Project Manager in 4 months and landed a Forbes placement for a client. Independently built a brand from zero to 1.5M+ organic views. I'm drawn to roles where positioning, messaging, and growth strategy sit at the centre of the product's success.

EXPERIENCE

SEO Executive — Growth & GTM Strategy · Business Standard *Mar 2023 – Present*

- Owned India GTM for high-intent financial events — IPO Season, Quarterly Results, AGMs — aligning channel timing, content depth, and distribution with peak investor demand windows
- Moved average ranking from 8.2 → 5.0 across core market priority terms (Sensex Today, Nifty Today) through search intent research and content repositioning
- Independently authored two cross-functional product proposals — IPO Tracker revamp and Share Price page redesign — benchmarking competitor UX (Moneycontrol, Livemint, Chittorgarh) and presenting phased roadmaps to product and editorial stakeholders; both in pipeline
- Built demand prioritisation models using GA4, GSC, SEMrush, and Looker Studio to separate sustained-coverage topics from event-driven spikes

Project Manager (Promoted from Intern) · RankSoldier Digital *Nov 2021 – Sep 2022*

- Promoted from content intern to Project Manager within 4 months — took on team management, client communication, and delivery oversight without being asked
- Secured a Forbes placement for a client — the team's first major earned media win — using HARO, Qwoted, SourceBottle, and Terkel to build authority pipelines for founders and CEOs
- Managed a 10+ person cross-functional team; built QC systems and delivery frameworks that reduced revision cycles across concurrent workstreams

SEO Intern · RankerzMedia *Oct 2022 – Feb 2023*

- Affiliate website SEO — keyword research, on-page optimisation, and content briefs for high-intent commercial queries

Market Research Intern · Explorra Design Institute *Jul 2021 – Oct 2021*

- Built contact intelligence databases for Tier 1/2 colleges — mapping Deans, HODs, and Placement Cells for structured outreach and market segmentation

PROJECTS & INDEPENDENT WORK

Founder — The Peak View Stories · Independent Project *Mar 2025 – Aug 2025*

- Built a satire news platform from zero — defined positioning and tone-of-voice, deployed full website via AI-assisted vibe coding, owned all content and Instagram distribution independently
- Grew a brand-new Instagram channel to 1.5M+ organic reel views (zero paid); individual posts reaching 100K–500K+
- Earned featured placements as Founder in Under30CEO, TechBullion, and CMO Times through Digital PR
- Grew website to 7,600 active users across 254 indexed pages via organic search within 6 months

Author — The Second Draft · LinkedIn Newsletter *Aug 2025 – Present*

- Career transitions and non-linear growth; 232 subscribers grown organically with zero paid promotion
